**Notice of Demand in Support of Affidavit for Arizona Legislature and Arizona DCS Crimes
Against the People**

Notice to Agent is Notice to Principal and Notice to Principal is Notice to Agent

I, _____, one of the People, am presenting this notice to you that you,
and your agents may provide due care;

Please take notice that the attached Affidavit presents issues of law that I wish to have
answered immediately as one of the People;

Please take notice that Government workers are to follow the law, and that ignorance of the law
is no excuse;

Please take notice that the Federal Authority that tracks missing children has put forth shocking
information about the entities that Legislatures have been allowing to take children without
constitutional protections:

In 2017, NCMEC assisted law enforcement with over 27,000 cases of missing children, the
majority who were considered endangered runaways.

According to their most recent report compiled from FBI data and their own, of the nearly 25,000
runaways reported to NCMEC in 2017, one in seven were likely victims of child sex trafficking.
Of those, 88 percent were in the care of social services when they went missing. [Highlight
Added for Emphasis]

It is therefore the wish, demand, and order of I, one of the People, that this issue be investigated
immediately, that the Legislature present where they were granted these powers in the Arizona
State Constitution and that justice be given to all parents who have had their children taken
without Courts of Record and constitutional protections and authorities as protected by the
Common Law and Constitution of the State.
