

Notice of Demand in Support of Affidavit for Arizona Legislature and Arizona DCS Crimes Against the People

Notice to Agent is Notice to Principal and Notice to Principal is Notice to Agent

I, _____, one of the People, am presenting this notice to you that you, and you agents may provide due care;

Please take notice that the attached Affidavit presents issues of law that I wish to have answered immediately as one of the People;

Please take notice that Government workers are to follow the law, and that ignorance of the law is no excuse;

Please take notice that the Federal Authority that tracks missing children has put forth shocking information about the entities that Legislatures have been allowing to take children without constitutional protections;

In 2017, NCMEC assisted law enforcement with over 27,000 cases of missing children, the majority who were considered endangered runaways.

According to ttheir most recent report compiled from FBI data and their own, of the nearly 25,000 runaways reported to NCMED in 2017, one in seven were likely victims of child sex trafficking. Of those, 88 percent were in the care of social services when they went missing.

It is therefore the wish, demand, and order of I, one of the People, that this issue be investigated immediately, that the Legislature present where they were granted these powers in the Arizona State Constitution and that justice be given to all parents who have had their children taken without Courts of Record and constitutional protections and authorities as protected by the Common Law and Constitution of the State.
